Contact the distributor if any part is missing!

Supermum & Nosiboo

to be continued...

USING THE NOSIBOO PRO

1. Assemble the Colibri head

First clean* and dry the parts of the Colibri head.
*Check the "CLEANING" section below for more details about the proper cleaning method.

The device can be used for removing the nasal mucus from a child's nose. It cannot be used for any other purpose.

2. Assemble the remaining parts

The device is ready to use.

INSTRUCTIONS FOR USE & SETTINGS

1 Select the correct suction power.
Setting recommendations:
* min. setting for newborns;
* middle setting for babies;
* max. setting for small children and preschoolers.

! The effective and strong (max) suction power has been proven safe for nasal aspiration by ENT doctors.

! If the mucus is thin, you can use the device at a lower setting. If it is thick you can use the device at a higher setting than normal.

2 Turn on the device by pushing the control button and wait 5 seconds.

! Hold your child in a stable position.
* Aspirate the nose of infants after laying them into a stable position and hold their head during the process.
* You may also sit them in an infant bouncer or infant seat.
* If the child is already able to sit, sit them in your lap. In this case, do not lay the child on their back during the aspiration.

3 Insert the clean, dry nose tip into the child's nostril.
* Move the nose tip around gently to make sure that you get all areas of the nostril.

4 Switch off the device with the control button after use, but don't unplug the device from the electrical outlet until it is completely shut down (min. 5 seconds).

5 Remove the connecting tube and the nose tip, then take apart the Colibri housing.

CLEANING

* Wash the parts with liquid soap and lukewarm water.

AFTER-SALE SERVICE
